Due to roadway widening some borrow material will be needed from land adjacent to or within the proximity of the project. If you are an adjacent landowner and have land not containing easement wetlands that you feel could be used for borrow without affecting your farming operations, please let us know.

Some of the wetlands within the TRR right of way will be filled in due to roadway widening. If you are a landowner and have land that you're willing to set aside for conversion to a wetland or expansion of an existing wetland, please let us know.
